

Dear residents,

Bloomfield is embarking on a detailed sanitary sewer evaluation with the Civil Engineering firm, HR Green, Inc. The evaluation will identify potential sewer improvement projects and reduce future wastewater-related operation and maintenance costs. Once completed, these projects should help the City to comply with the Environmental Protection Agency's (EPA) Consent Order. More information regarding the Consent Order is included in the enclosed educational flier.

A citizen questionnaire is also attached to ask residents about sewer issues near or around their home. This information is vital in identifying areas of concern throughout town – now is your chance to have a voice in the planning process! We are asking for your support by taking 2-3 minutes to complete the questionnaire.

If you are interested in learning more about the sanitary sewer evaluation, a series of public meetings will be held this year, with the time and location yet to be determined. More information about these meetings will be provided later this year.

Sincerely,

Dan Wiegand, Mayor
